## APPLICATIONS AND FEATURES:

Southwire's 600 Volt Type TC-ER power cables are suited for use in wet and dry areas, conduits, ducts, troughs, trays, direct burial, aerial supported by a messenger, and where superior electrical properties are desired. These cables are capable of operating continuously at the conductor temperature not in excess of $90^{\circ} \mathrm{C}$ for normal operation in wet and dry locations, $130^{\circ} \mathrm{C}$ for emergency overload, and $250^{\circ} \mathrm{C}$ for short circuit conditions. For uses in Class I, II, and III, Division 2 hazardous locations per NEC Article 501 and 502. Constructions with 3 or more conductors are listed for exposed runs (TC-ER) per NEC 336.10. VW-1 Rated. Sunlight Resistant - For Direct Burial - Silicone Free
